

historical

Augmented Reality 3D (2016) VR Corp by Aholis

• Mobile technology using iPad mini's to enhance tourism during visits to Acropolis

Enabled tourist to view the same multitude of structures with its intended design

- Added additional layers of viewing for tourists including colours, pinch to zoom for finer details, art pieces, and structures/statues

Historic Tourism

ACROPOLIS 3D with Augmented Reality (2016)

- Mobile technology using iPad mini's to enhance tourism during visits to Acropolis
- Enabled multitude of tourist to view the same structure with it's intended design
- Added additional layers of viewing for tourists including colours, pinch to zoom for finer details, art pieces, and structures/statues
